I am a scientist mainly interested in human behaviour, and more recently quantitative methods and reproducible science.

About me

I am an Associate Professor and Researcher at the Human Behaviour Lab (LACH), Faculty of Psychology, at Universidad El Bosque in Bogota, Colombia. My research interests include mate choice and human vocal communication, with an aspiration towards understanding musicality. I am also interested in bioacoustics and psychoacoustics, as well as hormonal effects on human behaviour. I am getting more and more passionate about quantitative methods and R programming, to promote reproducibility and open science.
